ANKUR BOHRA

9315593938 ankurbohra70@gmail.com Linkedin Github Leetcode

Summary

- Backend-focused Software Engineer skilled in Java, Spring Boot, and Microservices with hands-on experience building scalable, high-performance systems.
- Strong in multithreading, exception handling, and debugging, with proven teamwork, communication, and problem-solving abilities.

Education

National Institute of Technology, Tiruchirappalli **2021 – 2024**
Master of Computer Applications (MCA) - CGPA: 7.26 *Trichy, India*

Deen Dayal Upadhyaya College, University of Delhi **2018 – 2021**
B.Sc (Hons) Computer Science - CGPA: 7.47 *New Delhi, India*

Experience

Software Development Engineer Intern **July 2025 – Present**
Mobikwik *Gurgaon, India*

- Engineered and deployed 5 feature-rich tabs on the **MerchantPanel** dashboard, reducing merchant data operation time by 30% and improving efficiency for over 10,000 active merchants.
- Diagnosed and resolved a critical **latency bottleneck** in the soundbox transactional system, achieving 2x faster response times and ensuring more reliable payments.
- Integrated features across **MerchantPanel, MerchantBackend, MerchantDevices** repositories, resulting in a 25% reduction in bug reports during production releases.
- Worked with **Java (multithreading, exception handling), Spring Boot, AWS IoT, and MQTT protocol**, focusing on backend development, cloud integration, and real-time communication.

Projects

Raahi App | Spring Boot, PostgreSQL, React Native, Google Maps **Link**

- Engineered a ride-sharing platform with multi-ride scheduling, handling 5,000+ rides monthly and boosting cab utilization efficiency.
- Designed and implemented an **n-batching algorithm** that optimized real-time ride grouping, improving booking efficiency by 20% and reducing passenger costs.
- Built and integrated a secure **e-wallet system** with automated invoicing and payments, cutting manual transactions by 40% and enhancing user trust.

Personalized Travel Recommender | Java, Spring Boot, PostgreSQL, Redis, AWS **Link**

- Architected and developed a full-stack platform offering personalized destination, itinerary, and accommodation recommendations based on user profiles.
- Designed, built, and deployed **RESTful APIs** in Spring Boot for user management, bookings, and reviews, integrating with external **Weather, Maps, and Booking APIs**.
- Optimized backend performance with **Redis caching and AWS auto-scaling**, reducing response times by 40% and improving reliability under high traffic.

Skills

- **Programming:** Java, C++, Python, JavaScript, SQL
- **Backend & Frameworks:** Spring Boot, Node.js, Express.js, RESTful APIs, Microservices, MVC Design Patterns
- **Frontend:** React.js, HTML5, CSS3, Bootstrap
- **Databases:** MySQL, PostgreSQL, MongoDB, SQLite
- **Cloud & Tools:** AWS (IoT, EC2, S3), MQTT, Docker, CI/CD, Kubernetes, Git/GitHub
- **Core CS:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks
- **Professional:** Problem-Solving, Debugging & Analytical Skills, Communication, Team Collaboration, Passion to Learn

Leadership & Achievements

- Vice President of Sanganika and Competitive Programmers Lead at DDUC; directed 200+ students, organized Tech-Marathon with 1500+ participants, and delivered CP workshops impacting 100+ students.
- Secured top positions in inter-college coding competitions (Hardcode, Crack-and-Swap, Blackbox) and awarded prizes in multiple tech events across DU and NIT Trichy.
- Felicitated with a merit scholarship for securing Rank 2 in CISCE Board Exams.
